

Retail Point of Sale 2006/07

Point of Sale made easy

Features & Benefits

Inventory Management

Retail Point of Sale manages all types of inventory. You can track sales and stock on hand for a particular item. You have the ability to track service items, group items to sell as a kit or purchase in a case and sell as a 6 pack. Or perhaps you need to track sales by units of measure i.e. kilos, metres or litres.

Customer Management

The retail industry is very competitive and one of the best ways to keep your customers coming back is to be loyal to them. Customer accounts can be easily managed at the point of sale, with the ability to set special pricing for family members, staff or loyal customers; charge transactions to an account and accept payments.

Seamless integration to QuickBooks

A retail solution is not complete without a seamless integration to the world's best selling accounting solutions, QuickBooks. Retail Point of Sale has a seamless integration with QuickBooks inventory, customer accounts, sales people and chart of accounts. Choose from QuickBooks Plus, QuickBooks Pro, QuickBooks Premier or QuickBooks Enterprise.

Promotions

Retail Point of Sale makes setting up promotions easy. Set up your promotions ahead of time, assign the date and time the promotion is to start and finish then sit back and let Retail Point of Sale do the rest.

Name	Type
Baby Club Promo	Baby C
Levi Sale	All
Stocktake Sale	All
Summer Sale	All

BONUS - label design and print software

Retail Point of Sale includes a comprehensive label design and print feature, built into the software. Design your own shelf labels, advertising cards, barcodes for products or customer cards. The choice is endless.

Retail Point of Sale 2006/07

Point of Sale made easy

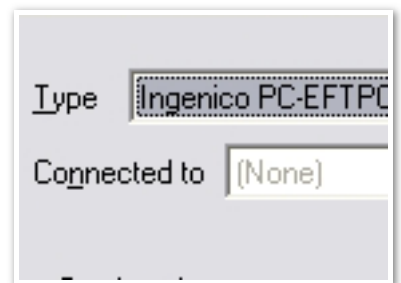

New Features

Table tracking and kitchen printing

Record a table number with your transaction and only the items required from the kitchen will be sent to the kitchen printer. The number of orders placed for a table is also tracked and a Write Off function is available for you to record order adjustments or cancellations appropriately.

Ingenico/PC-EFTPOS Integration

With integrated EFTPOS you can eliminate double entry errors. Point of Sale Terminal now integrates with NAB, CBA, ANZ, WPC, STG and Bank West using an Ingenico/PC-EFTPOS terminal. With one touch, a sales amount is sent to your EFTPOS terminal. This integration makes reconciling at the end of the day an easier process. Call your bank for more information on obtaining your Ingenico/PC-EFTPOS terminal.

Layered Touch Screen

With Retail Point of Sale touch screen functionality you can create as many touch screen layers and touch buttons as you need. Choose your own colour scheme, size and even add pictures to your buttons. This is perfect for the retailer that can not scan all stock, for example; bars, cafes or bakeries.

Other Features Include

- Transactions on hold
- Over 100 reports
- Transaction history for reprinting receipts
- Fast price checks
- Training mode
- Layby
- Currency conversion

Point of Sale Hardware Supported

- Receipt Printers
- Barcode Scanners
- Cash Drawers
- Customer Displays
- POS Keyboards
- EFTPOS Terminals
- Scales
